Accumeter Visible Spectrophotometer

SP-800 series

Product description

The SP-800 series single beam visible spectrophotometers are a low-cost, easy-to-use, and reliable general purpose instrument designed for laboratories and educational needs. The SP-800 series visible beam spectrophotometer comes with 2 models. The SP-830+ standalone model measures the traditional absorbance, transmittance and concentration. And the PC enabled SP-880 with enhance measurement features such as spectrum scan, kinetic, quantitative.

The SP-800 series visible spectrophotometers are a compact, low-cost instrument with all the essentials for teaching and routine laboratory use.

Key Features

■ Reliable optical design to ensure accurate results

With minimum moving parts there is little maintenance need to be performed on the SP-800 series. The optical system is built in with a grating monochromator to provide a wavelength of 320nm~1100nm.

■ Simple to read LCD display

With the 2 line LCD display, users can easily operate and read the result on the instrument.

■ Versatile sample compartment for flexibility

The versatile sample compartment allows the SP-800 series to hold a wide range of cuvettes, test tubes, and cells, thus providing the flexibility for teaching laboratories and routine use for accurate and efficient measurements.

■ Build-in validation tool for trouble shooting

The built-in validation tool within the SP-800 series can help users check wavelength accuracy and bandwidth without taking the instrument to a technician for verification.

Reliable accurate and easy to use for all applications

Key Features

■ Advanced measuring features only found in high end instrument (SP-880 only)

The SP-880 includes advance measuring features found only in high end instruments such as Spectrum, Time scan, Kinetic, Quantitative, and Protein analysis to provide researchers with a instrument that meets all their needs.

■ Flexible PC software to enhance measuring method (SP-880 only)

The SP-880 also comes with a PC-Mate software to help users store or export their data onto a PC or to an Excel spreadsheet.

Specification

Model Number	SP-880	SP-830+
Optical Design	Single beam	Single beam
Light Source	Halogen lamp	Halogen lamp
Detector	Silicon photodiode	Silicon photodiode
Bandwidth	2nm	5nm
Wavelength Range	330-1100nm	320-1100nm
Wavelength Accuracy	+/- 0.8nm	+/- 1nm
Wavelength Repeatability	+/- 0.35nm	+/- 0.35nm
Scanning Speed	4500nm/min	4500nm/min
Photometric Range	-0.300~3.5A	-0.300~3.5A
	0.3~150 %T	0.3~150 %T
	0.02~34996 C	0.02~34996 C
Measurement Mode	Absorbance,	Absorbance,
	Transmittance,	Transmittance,
	Concentration	Concentration
Photometric Accuracy	1.0% or 0.003A(from 0.000 to 2.500A),	1.0% or 0.003A(from 0.000 to 2.500A),
	whichever is greater	whichever is greater
Photometric Precision	0 ~ 2.5A 0.0001	0~2A 0.0001
	2.5 ~ 3A 0.001	2~3A 0.001
	>3A 0.01	>3A 0.01
Factor	0.1 ~ 9,999.9	9999
Stability	< 0.003A/hr at 500 nm after one hour warm-up	< 0.003A/hr at 500 nm after one hour warm-up
Stray Light	<0.1% at 340nm	<0.1% at 340nm
Data Storage	100 sets	N/A
Display	16 x 2 large LCD display	10 x 2 LCD display
Sample Holder	10mm square cuvette	
	10~13mm round tube	10mm square cuvette
	16mm round tube(option)	10~13mm round tube
	50mm rectangular cell	50mm rectangular cell
	1 inch test tube	
Interface	RS232 and parallel port	Parallel port
PC Compatibility	PC-mate software	N/A
Power	100 ~ 240V at 50/60Hz	100 ~ 240V at 50/60Hz
Dimension	400(W) x 300(D) x 145(H)mm	400(W) x 300(D) x 145(H)mm
Weight	7.5 kg	7.5 Kg

Ordering Information

PART NUMBER	DESCRIPTION
SP-830+	Visible spectrophotometer
SP-880	Visible spectrophotometer with PC compatibility
SP-8001	UV- Visible spectrophotometer
M965	400~900nm Microplate reader
M965+	340~900nm Microplate reader
M6+	Mini photometer
